

#1 The Minimum Software Specifications of your document on the top of page 9 suggests that the Town of Vernon owns (12) vSphere Enterprise licenses. I thought you only owned (6). Can you confirm the total number of licenses you have so I can determine if additional new licenses needed to be purchased or if only upgrades are needed as noted in the RFP

We own 6 enterprise licenses and need to upgrade those to enterprise plus and then get an additional 6 enterprise plus licenses for the schools.

#2 Do you want mission critical same day 4 hour on-site with parts service on the servers or just for the SAN? Again you can quote for different options on both, But the Sans we will most likely want a faster response.

#3 How many Site Recovery Manager licenses do you want to purchase? They come in (25) VM packs. We will probably need 100 or an enterprise version

#4 Did you purchase a VMware Acceleration kit when you purchased any of your vSphere / ESX licenses? None that I know of as I was supposed meet with our vmware rep so that I can find out exactly what I need for this project and if you put in a quote and we find out that some things need to change or to be added, we can make adjustments.
