FortiGate Firewall Q & A

Q: What model of SonicWall firewall is being replaced?

A: The current SonicWall is an NSA 4500

Q: How many users does this support?

A: This device supports 250+ concurrent users.

Q: How do you envision users accessing the VPN, through the web (SSL) or client (IPSec)?

A: Users should access the VPN using an IPSec client application. In the future we may also want to utilize the FortiGate SSL Web Portal for a limited number of users.
